CARDIAC PATIENT

65 year female patient, had undergone cardiac arrest on road, and brought to AHCH..

She underwent aggressive resuscitative efforts and after 20 mins of CPR patient was revived.

She was comatose for 15 days and hypoxic brain damage was confirmed on MRI brain.

She was managed in ICU at initial phase and good rehabilitation programme in the ward by our excellent team of physiotherapists.

She did very well and went home walking after 2 months of admission.

TRAUMATIC BRAIN INJURY

35 year old male patient, admitted at renowned Corporate hospital in Anand with severe traumatic brain injury after a road traffic accident, where surgery was performed and skull bone was removed.

He had infection in the brain fluid and lungs and patient was in comatose condition.

He was told to go home in view of poor prognosis.

Patient was brought to AHCH, was managed in the ICU initially then in ward, underwent 3 different complicated brain surgeries in 3 months followed by an aggressive rehabilitation programme.

He did very well and he went home walking.
